# 🧠 Jupyter Notebook Shortcuts (Mac) – Cheatsheet

## 🔄 Mode Switching

- **Command Mode (Blue border)**: `Esc`
- **Edit Mode (Green border)**: `Enter`

## 💬 Comment / Uncomment Code

- **Comment/Uncomment Line(s)**: `Cmd + /`

## ➕ Insert Cells

- **Insert Cell Above**: `A` (in command mode)
- **Insert Cell Below**: `B` (in command mode)

## ✂️ Cell Operations

- **Cut Cell**: `X` (in command mode)
- **Copy Cell**: `C` (in command mode)
- **Paste Cell Below**: `V` (in command mode)
- **Delete Cell**: `D` then `D` (press D twice in command mode)

## 🆘 See All Shortcuts

- **Open Keyboard Shortcut Help**: `Cmd + Shift + H` (in command mode)

## 🔄 Convert Cell Type

- **To Code Cell**: `Y` (in command mode)
- **To Markdown Cell**: `M` (in command mode)
- **To Raw Cell**: `R` (in command mode)

## 📝 Markdown Formatting (in Markdown cells)

- **Bold**: `**bold**` → **bold**
- **Italic**: `*italic*` → *italic*
- **Inline Code**: `` `code` `` → `code`
- **Headers**:
  - `# Header 1`
  - `## Header 2`
  - `### Header 3`, etc.
- **Unordered List**: `- item` or `* item`
- **Ordered List**: `1. item`

## 🧩 Merge and Split Cells

- **Merge Selected Cells**: `Shift + M` (in command mode)
- **Split Cell at Cursor**: `Ctrl + Shift + -` (in edit mode)

## 💾 Save Notebook

- **Save**: `Cmd + S`

## 🏃 Running Cells

- **Run Cell and Move to Next Cell**: `Shift + Enter`
- **Run Cell and Insert Below**: `Option + Enter`
- **Run Cell and Stay in Place**: `Ctrl + Enter`

## 🧭 Navigation

- **Select Cell Above**: `K or Up Arrow`
- **Select Cell Below**: `J or Down Arrow`

> 💡 *Pro Tip*: Press `Esc` to enter command mode, and `Enter` to go back to edit mode. Most shortcuts work only in command mode!
